

ENGINEERED WATER & WASTEWATER SOLUTIONS

Company Profile & Brief

Overview

Redhill Royalty Plus Ltd is a trusted provider of engineered water and wastewater treatment solutions. Established with a mission to improve access to clean water and sustainable wastewater management, the company delivers comprehensive services across design, engineering, installation, operations, and long-term maintenance.

With over a decade of presence, Redhill Royalty Plus has supported municipal authorities, industries, and real estate developers with solutions that protect public health, preserve the environment, and comply with regulatory standards.

Core Services

- Wastewater Treatment Plants – Design and implementation of facilities using clarifiers, aeration tanks, and sludge management systems.
- Water Treatment Solutions – Filtration, disinfection, reverse osmosis, and purification systems for safe drinking water.
- Operation & Maintenance – 24/7 operational support, preventive maintenance, compliance reporting, and efficiency monitoring.
- Consulting & Engineering – Feasibility studies, process design, optimization, and advisory on regulatory compliance.
- Environmental Solutions – Sludge treatment, water recycling, and reuse strategies that support sustainability and circular economy practices.

Our Value Proposition

- Over 10 years of proven industry expertise with a track record of successful projects.
- Tailored solutions addressing unique municipal, industrial, and community needs.
- Alignment with both Nigerian and international water quality regulations.
- A multidisciplinary team of engineers, technicians, and project managers.
- Focus on innovation, sustainability, and long-term client partnerships.

Clients & Sectors

- Municipal water boards and state utilities.
- Industries such as oil & gas, food & beverage, and manufacturing.

- Residential real estate developers and estates requiring packaged systems.
- International development agencies and NGOs focused on water access and sanitation.

Mission

To deliver innovative, sustainable, and cost-effective water and wastewater treatment solutions that safeguard health, preserve the environment, and enable socio-economic growth.

Vision

To be recognized as a trusted leader in water and wastewater treatment across Nigeria and Africa, setting benchmarks for technology, service quality, and environmental stewardship.

Technical Capabilities

- Advanced wastewater treatment including aerobic and anaerobic processes.
- State-of-the-art monitoring and control systems.
- Modular treatment plants suitable for urban and rural communities.
- Capacity to execute turnkey projects from concept to commissioning.
- Integration of renewable energy solutions to reduce operational costs.
